# Fair Value Assessment Outcome: Angel Risk Management – Cyber

## Key Findings

Product Overview	
<p>This product is designed for those who require insurance protection against the financial impact of cyber risks, such as hacker attacks, ransomware, social engineering fraud, denial of service attacks, reputational damage or compensation claims made against the business for failing to keep personal or commercial data secure. Having a comprehensive cyber insurance policy not only provides financial protection if the worst happens, but also provides access to expert advice and support when an incident occurs, such as IT, legal, forensic and media relations to minimise the disruption to the business and any reputational damage.</p> <p>See detailed Target Market Statement for detail on the range of customers the product is designed for as well as the groups of customers for whom the product is not appropriate and will not provide the intended value.</p>
